| | Trade Name | INCI Name | Function | % |
|----|--|---|---------------------------------------|-------|
| A. | KF-96A-6cS (<i>Shin Etsu</i>) | Dimethicone | Emollient | 62,40 |
| | FDP-C-White3 (<i>Nikko</i>) | Talc, CI 77891, Hydrogen Dimethicone, Aluminum Hydroxide | Pigment | 2,50 |
| | FDP-C-Red3 (<i>Nikko</i>) | Talc, CI 77891, CI 77491, Hydrogen Dimethicone, Aluminum Hydroxide | Pigment | 2,50 |
| | FDP-C-Yellow3 (<i>Nikko</i>) | Talc, CI 77891, CI 77492, Hydrogen Dimethicone, Aluminum Hydroxide | Pigment | 2,50 |
| | FDP-C-Black3 (<i>Nikko</i>) | Talc, CI 77891, CI 77499, Hydrogen Dimethicone, Aluminum Hydroxide | Pigment | 2,50 |
| | KSP-411 (<i>Shin Etsu</i>) | Polysilicone-1 Crosspolymer | Texturizing Agent | 7,00 |
| | Prizmalite P2011SL (<i>Prizmalite</i>) | Glass Beads | Texturizing Agent | 2,00 |
| B. | Bentone Gel TN V (<i>Elementis</i>) | C12-15 Alkyl Benzoate, Stearalkonium Hectorite, Propylene Carbonate | Rheology Modifier | 3,60 |
| | KSG-1610 (<i>Shin Etsu</i>) | Methyl Trimethicone, Dimethicone/Vinyl Dimethicone Crosspolymer | Texturizing Agent, Thickener | 3,00 |
| C. | Permalene 500 Polyethylene (<i>New Phase Technologies</i>) | Polyethylene | Body Agent | 11,00 |
| D. | Blue Oleoactif (<i>Oléos</i>) | Glycine Soja Oil, Polyglyceryl-3 Diisostearate, Oryza Sativa Germ Extract, Oryza Sativa Extract | Whitening, Antioxidant, Antipollution | 1,00 |

Manufacturing process

Disperse powders into dimethicone (phase A). Thoroughly disperse Bentone and KSG (phase B) into phase A. Heat up to 90°C and add polyethylene wax. Below 80°C add Blue Oleoactif and finally pour into the final containers.

TECHNICAL MARKETING PROFILE

ST4-0-11

STICK THE STRESS AWAY!

Perfect coverage all around with this **pocket stick foundation**. Our **FDP series** pigments give the perfect colour match with different kind of complexion shades and have also great texture. **Prizmalite P2011SL** is a texturizer that enhances colour of pigments. **Blue Oleoactif** effectively **protects cells** from urban pollution and blue light, and **boosts** their defense system.

Key Ingredients

FDP-C series: must-have treated pigments for silicone-based formulations, with high consistency of the shade, no need for colour-matching. The colour consistency allows to skip the colour matching stage at the end of the manufacturing process.

Technical Plus

Prizmalite P2011SL: it is a texturizer made of glass spheres with particles size of 4 micron. It acts as a magnifying lense, enhancing pigment effects. It gives soft-focus too, thanks to its spherical and transparent shape. The result is a higher colour yield.

Active Plus

Blue Oleoactif: it has nourishing and antioxidant activity, it is effective against hyperpigmentation due to blue visible light and it inhibits the damages to the skin due to pollution.

Unique plus of the formula

A pocket size product with **high colour performance** and **great texture**.

Consumer benefits

- **pocket size** foundation
- **comfortable texture**

Free of:

- Sulfates
- Synthetic Dyes
- Petrolatum
